

Financing on the way

In the Professional Helicopter Pilot Observer program all the needs for a helicopter pilot are satisfied by bringing the candidate to a final experience of 500 hrs TT but the cost of the program is definitely higher than a simple commercial license.

In reality the cost of this program is almost double and only few candidate could afford it. This is the reason why Twinair is seeking approval with several Financing and Student loan organization to be able to offer both the financial support and the guarantee of employment at the end of the training program.

The amount financed is \$70,000.00 with repayment at the end of the training once able to generate enough income to make the payments, condition could vary from 15 to 30 years loan with very low monthly payments and interest rates fixed or variable depending on your credit score or your co-signer credit score.

So far two organizations have responded and we are waiting for final approval so that a lot more candidate will be able to access our PHPO program and get started in their professional helicopter pilot career.

Hiring will be assured by either Twin Air or its associated company AIR Security, hundreds of flight hours per year will speed up your career to the next step in your helicopter industry or if you will prefer staying with us will get you to the next level of salary and benefits you deserve.

Hope you will find our offer interesting please contact Maggie or myself for more details on your PHPO program.
